

## automoto-better used cars

### Description:

"automoto ...better used cars" opened its doors on June 1st 2004. We sell cars ranging from Â£3,000 to Â£15,000 in price and always have 25 - 35 in stock.

We state "better used cars" because that is exactly what we provide. Every car goes through the same rigorous procedure before being sold and the majority come with 12 months warranty FREE of charge.

Because we have the ability to update our website within minutes, everything you see is bang up to date. (Click on the visit website link to the right)

### Why Better?

Before being bought into stock, every car...

Is inspected thoroughly to ensure no major accident damage.

Is test driven to make sure there are no major mechanical faults.

Has all HPI registers checked for outstanding finance, for stolen vehicles and for total loss claims.

After being bought into stock...

Every car is checked from bumper to bumper by independent mechanics to make sure they are 100% mechanically sound. Any parts which need replaced (e.g. tyres, wheel trims, brake pads, discs or drums) are replaced. The car is serviced if due and prepared for MOT if necessary too.

Any minor "car park dents" are removed by Dents Devils and very rarely do we need to have any panels painted.

If we do need a panel painted, we first take a digital photograph. This means that we can show you how minor the scratch or dent has been previously.

Finally, each car receives a full Autoglym® valet treatment to "remove the previous owner" and

protect the car's bodywork and interior.

Warranty...

Because we prepare every used car to this high standard we are happy to guarantee our cars for 1 year FREE of charge. (The only cars not guaranteed for 1 year are those, which are over 5 years old or have covered more than 75,000 miles.)

Finance...

We work closely with three major finance companies so we can always offer the most competitive rates and packages available. NIIB, GE Capital Woodchester and Blackhorse are our finance partners.automoto...better used cars
